

## Comments regarding RM-10352

The petition to subdivide the 160 meter band should be denied. As I see it, it is nothing more than an attempt to gain special protection status for a particular group of operators and it is totally unnecessary as things have worked quite well on 160 all this time. If anything, what is needed is regulation on contesters who regularly forget good operation practices during contests and spread out over the whole band making life miserable for the vast majority of hams that do not contest.
